

## Operators:

### 1. Arithmetic

$+$ ,  $-$ ,  $*$ ,  $/$ ,  $\%$

Ex:  $a = 5$ ,  $b = 10$

$$a + b = 15$$

$$a - b = -5$$

$$a * b = 50$$

$$a / b = 0$$

$$a \% b = 5$$

$$\begin{array}{r} b \overline{) a} \\ 0 \rightarrow \text{Quotient} \\ 10 \overline{) 5} \\ 0 \\ \hline 5 \\ \rightarrow \text{Remainder} \end{array}$$

### 2. Assignment

$=$ ,  $+=$ ,  $-=$ ,  $*=$ ,  $/=$ ,  $\%=-$

Ex:  $a = 5$   
 $a = a + 5;$   $\rightarrow$  resolving the left hand side  
 $a = 10$

$$\begin{array}{|c|} \hline a \\ \hline 5 \\ 10 \\ \hline \end{array}$$

$a = a + 5$   
 $a += 5;$   $\rightarrow$  Both are same

### 3. Logical

AND :  $\&\&$

OR :  $\|\|$

NOT :  $!$

F  $\rightarrow$  false

T  $\rightarrow$  true

<u>T</u>	<u>D</u>	<u>&amp;&amp;</u>	<u>\ \ </u>	<u>!T</u>	<u>!D</u>
F	F	F	F	T	T
F	T	F	T	T	F
T	F	F	T	F	T
T	T	T	T	F	F

### 4. Relational

Equal:  $==$ ,  $>$ ,  $>=$ ,  $<$ ,  $<=$ ,  $!=$

Ex:  $a = 5$ ,  $b = 10$ ,  $c = 5$

$a == b \rightarrow \text{false}$ ,  $a == c \rightarrow \text{true}$

$a < b \rightarrow \text{true}$ ,  $a > c \rightarrow \text{true}$

Note:

Relational operators always return the boolean value i.e. true/false

### 5. Concatenation:

$+$   $\rightarrow$  Applicable only for Strings

Ex:  $5 + 6 = 11$  String  $s = \text{"Apple"};$

$\text{"a"} + \text{"b"} = \text{"ab"}$

$\text{"Java"} + \text{"Selenium"} = \text{"JavaSelenium"}$

$\text{"a"} + 5 = \text{"a5"}$

$\text{"a"} + 5 + 6 = \text{"a5"} + 6 = \text{"a56"}$

$5 + 6 + \text{"a"} = 11 + \text{"a"} = \text{"11a"}$

### 6. Unary

Increment

Decrement

Note: In case of unary operator, the operand value is getting increased/decreased by one only & assigned to the respective value

a.  $x = 10;$

$y = ++x;$

$\text{print}(x); 11$

$\text{print}(y); 11$

<u>x</u>	<u>y</u>
10	
11	11

b.  $x = 10;$

$\rightarrow y = x++;$

$\text{print}(x); 11$

$\text{print}(y); 10$

<u>x</u>	<u>y</u>
10	10
11	

c.  $x = 10;$

$y = --x;$

$\text{print}(x); 9$

$\text{print}(y); 9$

<u>x</u>	<u>y</u>
10	
9	9

d.  $x = 10;$

$y = x--;$

$\text{print}(x); 9$

$\text{print}(y); 10$

<u>x</u>	<u>y</u>
10	10
9	

e.  $i = 20; j = 21$

$j = ++i + i++ + ++i - i--;$

$\text{print}(i); 22$

$\text{print}(j); 42$

<u>i</u>	<u>j</u>
20	
21	21
22	22
23	23
24	24

$$j = 21 + 21 + 23 - 23 = 42$$

f.  $s = 5;$

$t = s * + + + + + s;$

$\text{print}(s);$

$\text{print}(t);$

Jaya

Deepika

$t = 17$

$s = 6$

<u>s</u>	<u>t</u>
5	
6	18
7	5 + 7 + 6 + 6 + 6
8	
9	

### Thumb Rule to Solve:

If pre : 1<sup>st</sup> operate then use the value

If post : 1<sup>st</sup> use the value then operate
